Washington, DC 20510

February 10, 2017

Acting Administrator Catherine McCabe
U.S. Environmental Protection Agency
1200 Pennsylvania Avenue, N.W.
Washington, DC 20460

Re: Docket ID No. EPA-HQ-OAR-2016-0202

Dear U.S. EPA Acting Administrator McCabe:

We are writing regarding the proposed rule for the implementation of the 2015 U.S. Environmental Protection Agency's National Ambient Air Quality Standards (NAAQS) ozone nonattainment classification and the State Implementation Plan (SIP) requirements. The 2015 rule lowered the parts-per-billion (ppb) threshold to an unrealistic level and will result in harsh, lasting economic impacts in those communities where faulty air quality concerns are raised.

Our offices are closely working with affected stakeholders to try to change the nonattainment designation of Sheboygan County, Wisconsin, under the 2008 and the final 2015 ozone NAAQS rulemaking. The State of Wisconsin and Sheboygan County have installed a second monitor in Sheboygan County that clearly shows that the data from the current EPA monitor (Kohler Andrae ozone monitor, Site ID: 55-117-0006) is measuring emissions from outside of Wisconsin. Unfortunately, we understand that, to date, EPA personnel have been unwilling or unable to revisit the original boundary decisions that largely led to Sheboygan County's faulty nonattainment designation. After meeting with state and regional officials and learning how the county's designation came to be, along with the additional data collected by the second monitor, we feel compelled to share our deep concerns.

We request you direct agency officials to take immediate steps to ensure that Sheboygan County is no longer unfairly classified with an ozone nonattainment designation. Specifically, we find fault with the EPA monitor that is being used for air quality monitoring results and therefore, at the very least, request EPA alter the boundary lines of the Sheboygan nonattainment area in question.

Thank you for your prompt consideration of our request.

Sincerely,

Ron Johnson
U.S. Senator

Glenn Grothman
Member of Congress

Subject: 2016 Wisconsin Ambient Air Monitoring Data Certification – Ozone Network Data

Dear Mr. Kaplan:

Enclosed you will find an AMP600 data certification report dated February 9, 2017 that summarizes the 2016 ozone data from Wisconsin's criteria pollutant network and a summary of 2016 ozone data and QC completeness with the exception of five site National Performance Audit Program audits (i.e. UW-Green Bay (55-009-0026), Fond du Lac (55-039-0006), Chiwaukee Prairie (55-059-0019), Kewaunee (55-061-0002) and Lake DuBay (55-073-0012)) due to the data unavailability. The Wisconsin Department of Natural Resources's Air Management Program used the AMP600 report to review the ozone air quality data that was submitted to the US EPA Air Quality System. This report includes data collected from January 1, 2016 through December 31, 2016.

In compliance with paragraph (c) of 40 CFR 58.15(a), I certify that the ozone ambient air data and quality assurance data submitted by the Wisconsin Department of Natural Resources (Reporting Organization 1175) are submitted completely to AQS and ambient monitoring data are accurate to the best of my knowledge, taking into consideration the quality assurance findings.

Per EPA's request, we are submitting this certification electronically too. If you have any questions about this data, please contact Grant Hetherington at (608) 266-1552.

Sincerely,

Katie Praedel, Section Chief
 Air Monitoring Section
 Air Management Program

OCT 31 2016

REPLY TO THE ATTENTION OF:
AT-18J

Ms. Gail Good
Director, Bureau of Air Management
Wisconsin Department of Natural Resources
P.O. Box 7921
Madison, Wisconsin 53707-7921

Dear Ms. Good:

The U.S. Environmental Protection Agency has reviewed the Wisconsin Department of Natural Resources' 2017 Annual Air Monitoring Network Plan and approves the plan and proposed changes to your network of air quality monitors, but for the following:

Ozone Monitoring Season Waiver/Petition for Reconsideration: With the revision of the ozone NAAQS in October, 2015, EPA extended Wisconsin's ozone monitoring season from March 1 through October 15 (40 CFR Part 58, Section 4.1(i)). WDNR submitted a Petition for Reconsideration to Gina McCarthy on December 18, 2015, which included a request to shorten Wisconsin's ozone season. Until the Petition for Reconsideration has been acted on, WDNR must plan to monitor for ozone, statewide, during the required ozone season in effect January 1, 2017. EPA's approval of Wisconsin's 2017 Annual Air Monitoring Network Plan does not constitute approval of the shortened ozone season requested by the State of Wisconsin.

NO₂ Area-Wide Monitoring Requirement: 40 CFR Part 58, Appendix D, Section 4.3 requires the Milwaukee-Waukesha-West Allis metropolitan statistical area to operate two NO₂ monitoring sites. One site should be collocated with a near-road site and a second representative of area-wide NO₂ emissions. Wisconsin meets the near-road NO₂ monitoring requirement with the College Avenue near-road station and the area-wide monitoring requirement with the NO₂ monitoring conducted at the Photochemical Air Monitoring Station (PAMS) site at Southeast Regional office (SER/DNR). Therefore, Wisconsin may discontinue/shut-down the PAMS monitor at SER/DNR with the exception of the NO₂ monitor.

EPA evaluated the plan, as well as information about monitoring sites submitted to the Air Quality System database, and confirmed, with the above exceptions, that your network meets the operational requirements of 40 CFR Part 58.

We acknowledge and approve the following specific modifications included in WDNR's annual network plan:

Relocation of PM2.5 Monitor from Milwaukee-Fire Station (55-079-0056) to Near-Road Site at Milwaukee-College Avenue (55-079-0056): WDNR proposed to relocate the currently operating PM2.5 monitor from the Milwaukee Fire Station to the existing near-road site located at College Avenue to meet PM2.5 monitoring requirements at the near-road location.

Meteorological Towers – Shut-Downs and Tower Height Waivers: Meteorological towers are only required at NCore (40 CFR Part 58, Appendix D, Section 3(b)) and PAMS (40 CFR Part 58, Appendix D, Section 5.3, Table D-6). Since none of the proposed meteorological tower shut-downs and height requirement deviations are at either NCore or PAMS, a waiver is not necessary or appropriate. The Quality Assurance Handbook for Air Pollution Measurement Systems Volume IV: Meteorological Measurements Version 2.0 (Final) states that “in most cases, to accommodate wind speed/wind direction sensors, a meteorological tower must be able to reach a height of 10 meters”. This is to ensure that the wind speed/wind direction measurements are not affected by surface conditions. Meteorological tower heights less than 10 meters may cause the data to be less useful.

PAMS removal: The PAMS monitoring requirements were revised on October 16, 2015. These revisions changed network requirements for fixed PAMS and requires Enhanced Monitoring Plans (EMP) (40 CFR Part 58, Appendix D, Section 5). As a result, at this time, Wisconsin is no longer required to operate PAMS sites. However, Wisconsin may be required to develop and implement an EMP for ozone and ozone precursors for Moderate and above 8-hour ozone nonattainment areas. An EMP must be submitted to the Regional Administrator no later than October 1, 2019 or two years following the effective date of a designation classification of Moderate or above for ozone nonattainment. Elements of an EMP are outlined in 40 CFR Part 58, Appendix D, Section 5(h).

If you determine that changes to your monitoring network are needed due to unplanned circumstances or revisions to the federal ambient monitoring and quality assurance requirements, the modifications must be reviewed and approved by EPA.

EPA appreciates your partnership in conducting ambient air monitoring. We look forward to working with you to continuously improve the quality of ambient air in Wisconsin. If you have any question or comments regarding this network review, please contact Michael Compher, Air Monitoring and Analysis Section Chief, at (312) 886-5745.

Sincerely,

Edward Nam
Acting Director
Air and Radiation Division

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION 5
77 WEST JACKSON BOULEVARD
CHICAGO, IL 60604-3590

SEP 01 2017

REPLY TO THE ATTENTION OF:

AT-18J

Ms. Gail Good
Director, Bureau of Air Management
Wisconsin Department of Natural Resources
P.O. Box 7921
Madison, Wisconsin 53707-7921

Dear Ms. Good:

The U.S. Environmental Protection Agency reviewed the Wisconsin Department of Natural Resources' 2018 Annual Air Monitoring Network Plan (ANP) and approves the plan and the proposed changes to your network of air quality monitors. Among the approved changes is the optimization of the PM_{2.5} monitoring network through replacement of several PM_{2.5} Federal Reference Method (FRM) samplers with Federal Equivalent Method (FEM) continuous Beta Attenuation Monitors (BAMs) and reduced sampling frequency at several FRMs across the state as presented in the plan and separate correspondence to EPA dated April 26, 2017.

EPA evaluated the plan and PM_{2.5} network optimization, along with data and information about monitoring sites submitted to the Air Quality System database, and confirmed that your network meets the operational requirements of 40 CFR Part 58.

We acknowledge and approve the following specific modifications included in WDNR's annual network plan and PM_{2.5} network optimization:

- PM_{2.5} Network Method Change
WDNR proposed to implement a method change for several PM_{2.5} monitoring sites in the state by changing the primary monitoring method at 8 PM_{2.5} monitoring sites (Appleton, Chiwaukee Prairie, Harrington Beach, Milwaukee College Ave. Park & Ride, Perkinstown, Potawatomi, Potosi and Trout Lake) to BAM. EPA recently approved this method and primary monitor change at the Potosi site in a letter dated March 7, 2017. After the BAMs are designated as primary monitors for each site in the Air Quality System, they become the monitor providing the PM_{2.5} design value for each monitoring site. FRMs will be discontinued at all these sites with the exception of Milwaukee College Ave. Park & Ride where a FRM will continue to operate in order to meet collocation requirements. With these changes, Wisconsin will operate 8 FEM primary monitors and 12 FRM primary monitors. Collocation requirements will be met as follows: 1 FRM/FEM: College Avenue Park and Ride (55-079-0058); 1 FEM/FEM: Devil's Lake (55-111-0007); 2 FRM/FRM: Milwaukee DNR SER (55-079-0026) and Green Bay East (55-009-0005).

- PM_{2.5} FRM Reduced Sampling

WDNR proposed to reduce sampling frequency at five FRM monitors from 1 in 3 days to 1 in 6 days: Green Bay (55-009-0005), Horicon (55-027-0001), La Crosse (55-063-0012), Madison University Avenue (55-025-0047) and Waukesha Cleveland Avenue (55-133-027). FRM is, and will continue to be, the primary sampling method at all 5 of these sites, along with an FEM BAM collocated at each. All 5 monitors meet the criteria in 40 CFR Part 58.12(d)(1)(ii) for approval of a waiver to reduce sampling frequency to 1 in 6 days without compromising the data needed to implement the PM_{2.5} NAAQS. Data at sites with collocated samplers will be processed in accordance with 40 CFR Part 50, Appendix N, Section 3(d) which requires that data from the designated primary monitor will be used for comparison the PM_{2.5} NAAQS unless there are missing/invalid daily values. In this case, values from a collocated FRM or FEM monitor will be used, if available.

- Relocation of PM_{2.5} Monitor at Trout Lake (55-125-0001)

WDNR proposed to move the Trout Lake monitor several yards farther from a tree line which would improve siting.

- Enhanced Monitoring Plan for Ozone

On December 19, 2016, Sheboygan County, Wisconsin was bumped-up to moderate non-attainment for ozone. As such, WDNR is required to develop and implement an Enhanced Monitoring Plan (EMP) in accordance with the revised Photochemical Assessment Monitoring Stations (PAMS) monitoring requirements promulgated on October 16, 2015 (40 CFR Part 58, Appendix D, Section 5). An EMP must be submitted to the Regional Administrator no later than October 1, 2019 or two years following the effective date of a designation classification of Moderate or above for ozone nonattainment; for Sheboygan County, that is December 19, 2018. Therefore, an EMP for Sheboygan should be included in Wisconsin's 2019 ANP (40 CFR 58.10). Elements of an EMP are outlined in 40 CFR part 58, Appendix D, Section 5(h). In addition, draft guidance (*Guidance for 1) Photochemical Assessment Monitoring Stations (PAMS) Required Network Implementation Plans (and waivers), and 2) Enhanced Monitoring Plans (EMPs)*) which is available to PAMS workgroup members through Sharepoint including WDNR, been developed and provides templates, for consideration, to develop and implement EMPs.

If you determine that changes to your monitoring network are needed due to unplanned circumstances or revisions to the federal ambient monitoring and quality assurance requirements, the modifications must be reviewed and approved by EPA.

EPA appreciates your partnership in conducting ambient air monitoring. We look forward to working with you to continuously improve the quality of ambient air in Wisconsin. If you have any questions or comments regarding this network review, please contact Michael Compher, Air Monitoring and Analysis Section Chief, at (312) 886-5745.

Sincerely,

Sorry I didn't get back to you sooner. I was trying to give John some time to give you his perspective. Overall, I think letter looks good. You may want to say something acknowledging the role of transport in the area and express EPA's intent to work within the framework of the Act to address ozone transport issues.

Hi Kathleen and John,
Here's my shot at a response to the control about Sheboygan. The incoming letter was a bit mixed up and unclear. Although, I understand it better since Kathleen gave me the background of what's been going on. Still, I wasn't sure how to respond or the level of detail. I appreciate your review and input.

Timing – I just found out this afternoon that I had to do the response and it is due Monday! Can't get an extension.

Thanks for your help.

p.s., there's some song about Sheboygan that I can't quite remember. I just googled and found, "Mention My Name In Sheboygan" but that's not the one. (I did just listen to it anyway. Do you know of other Sheybogan songs?

FYI – it looks like OCIR DAA Aaron Ringel met with House Oversight staff this week regarding the ozone monitor in Sheboygan County.

Gayvonne searched CMS and found the attached letter from Sen. Johnson and Rep. Grothman (dated February 2017) and the response from Acting AA Sarah Dunham (dated April 2017). This information has been shared with OCIR.

Subject: FW: Glenn Grothman, Ron Johnson and Scott Walker Letters

Hi, This week Aaron Ringel and Christian Rodrick had a meeting with some of the staff from House Oversight and they mentioned that there was a letter from Congressman Grothman regarding a NAAQS issue. Apparently the State has their own monitor they want to use and EPA is not allowing them to use it, because of its location by a lake.

Apparently EPA has also received a letter on this from Senator Ron Johnson and has heard about it from Governor Walker. We should have received the Grothman letter during the last Congress.

I looked in CMS and did not find a letter from any of them about this topic. Does this sound familiar at all? Would you be able to do a cms search to see if the region received any of these letters for response? Christian said it sounds like we have not responded to the letter, but there has recently been some minor communication about it.

Thanks,
 Pat

Hello Everyone,

Region 5 obtained a copy of the attached letter from Sen. Johnson and Rep. Grothman in Wisconsin. We were alerted to the letter after receiving approximately a dozen phone calls from concerned citizens who do not agree with the recommendation from their congressmen. I understand that the letter is now being controlled for response and the DC folks are asking whether it should be controlled to us here or to you guys. I don't know if you have a preference. I guess it is with OCIR right now. Regardless, we are happy to coordinate a response with your office.

Let me know your thoughts and we can go from there.

John

Subject: RE: Sheboygan letter?

Hello-

I have attached the letter our office, along with Rep. Grothman, sent to Acting Admin. McCabe. Today, our office sent an e-mail out to some residents of Sheboygan County letting them know we sent the letter to EPA, however there is no mention that they should call the EPA. I would suspect that the calls are coming from that, since the letter was sent Feb. 10.

One of my coworkers gave me a message that Anna Wagner from EPA called on the same issue, but I haven't reached out to her yet. Please let me know if you have any questions.

Subject: RE: Sheboygan letter?

I have gotten a follow-up question/request related to our response to the letter on Sheboygan (as it makes its way through the AO/OCIR review)- wondering if R5 has had any specific efforts with the state on Sheboygan attainment/monitoring/whatever related to ozone that we might report on in our response?
 Could you send this along to the right air people in R5 to see what they might have to say? I'd guess a sentence or two would be nice, if there is something there to say.

Thanks,
 Matthew

Denise,
 Thank you for cc'ing me on that note so I would have a heads up about this!
 Today, I got assigned the incoming letter in CMS for response, which I believe is a routing mistake. Given that it is about a specific location designation in R5, I believe it makes the most sense for you all in R5 to be the ones assigned the response to Sen. Johnson and Rep. Grothman. This has been the usual way of handling things, and also what OAQPS suggested to me moments ago. I'll plan on having it re-assigned to R5 unless I hear back that we need to discuss. Feel free to give me a ring.

Thanks,
 Matthew

Subject: RE: Sheboygan letter?

Hello-

I have attached the letter our office, along with Rep. Grothman, sent to Acting Admin. McCabe. Today, our office sent an e-mail out to some residents of Sheboygan County letting them know we sent the letter to EPA, however there is no mention that they should call the EPA. I would suspect that the calls are coming from that, since the letter was sent Feb. 10.

One of my coworkers gave me a message that Anna Wagner from EPA called on the same issue, but I haven't reached out to her yet. Please let me know if you have any questions.

Hi Tyler,
 It was nice meeting you in Milwaukee a couple of weeks ago. We are getting some citizen calls regarding a letter that Sen. Johnson sent to the EPA about Sheboygan

County air quality. Would it be possible to get a copy of that letter? It will help us to respond.

Thanks,
John Mooney

The Honorable Glenn S. Grothman
U.S. House of Representatives
Washington, D.C. 20515

Dear Congressman Grothman:

Thank you for your letter of February 10, 2017, to the U.S. Environmental Protection Agency regarding the designation of Sheboygan County, Wisconsin for the National Ambient Air Quality Standards (NAAQS) for ground-level ozone.

We will continue to work with Wisconsin on appropriate designations and boundaries for all areas in Wisconsin, including Sheboygan County. As part of the designation process, the EPA works closely with states, tribes and local governments to identify areas that meet or do not meet the ozone standards. States and tribes, including Wisconsin will have an opportunity to provide additional information for the agency to consider before making final designation decisions. We will consider the concerns you have raised as we move forward.

Again, thank you for your letter. If you have further questions, please contact me or your staff may contact Matthew Davis in the EPA's Office of Congressional and Intergovernmental Relations at davis.matthew@epa.gov or at (202) 564-1267.

Sincerely,

Subject: Draft response to control about Sheboygan designation

Hi Kathleen and John,
 Here's my shot at a response to the control about Sheboygan. The incoming letter was a bit mixed up and unclear. Although, I understand it better since Kathleen gave me the background of what's been going on. Still, I wasn't sure how to respond or the level of detail. I appreciate your review and input.

Timing – I just found out this afternoon that I had to do the response and it is due Monday! Can't get an extension.

Thanks for your help.

p.s., there's some song about Sheboygan that I can't quite remember. I just googled and found, "Mention My Name In Sheboygan" but that's not the one. (I did just listen to it anyway. Do you know of other Sheybogan songs?

Subject: FW: letter to EPA from WI Congressman regarding Sheboygan ozone designations

Hello Everyone,

Region 5 obtained a copy of the attached letter from Sen. Johnson and Rep. Grothman in Wisconsin. We were alerted to the letter after receiving approximately a dozen phone calls from concerned citizens who do not agree with the recommendation from their congressmen. I understand that the letter is now being controlled for response and the DC folks are asking whether it should be controlled to us here or to you guys. I don't know if you have a preference. I guess it is with OCIR right now. Regardless, we are happy to coordinate a response with your office.

Let me know your thoughts and we can go from there.

John

Subject: RE: Sheboygan letter?

Hello-

I have attached the letter our office, along with Rep. Grothman, sent to Acting Admin. McCabe. Today, our office sent an e-mail out to some residents of Sheboygan County letting them know we sent the letter to EPA, however there is no mention that they should call the EPA. I would suspect that the calls are coming from that, since the letter was sent Feb. 10.

One of my coworkers gave me a message that Anna Wagner from EPA called on the same issue, but I haven't reached out to her yet. Please let me know if you have any questions.

Tyler

Subject: Sheboygan letter?

Hi Tyler,

It was nice meeting you in Milwaukee a couple of weeks ago. We are getting some citizen calls regarding a letter that Sen. Johnson sent to the EPA about Sheboygan County air quality. Would it be possible to get a copy of that letter? It will help us to respond.

Thanks,

John Mooney

Subject: RE: Sheboygan letter?

Just talked with Mooney. He wants me to draft an email for him to loop in OAQPS (Doug I'll cc you on that).

Doug, when you get back we can listen to all the voicemails (I guess they are being forwarded to you) and write down names and contact info. Mooney said if it's manageable we should call each back individually but we will need to talk about what to say first.

Jenny,

You may want to pop your head in to Mooney's office and ask him what more he can tell you about this and the calls that have been coming in to the Region.

Thanks,

Doug

Subject: RE: Sheboygan letter?

I have gotten a follow-up question/request related to our response to the letter on Sheboygan (as it makes its way through the AO/OCIR review)- wondering if R5 has had any specific efforts with the state on Sheboygan attainment/monitoring/whatever related to ozone that we might report on in our response?
 Could you send this along to the right air people in R5 to see what they might have to say? I'd guess a sentence or two would be nice, if there is something there to say.
 Thanks,
 Matthew

Hello-

I have attached the letter our office, along with Rep. Grothman, sent to Acting Admin. McCabe. Today, our office sent an e-mail out to some residents of Sheboygan County letting them know we sent the letter to EPA, however there is no mention that they should call the EPA. I would suspect that the calls are coming from that, since the letter was sent Feb. 10.

One of my coworkers gave me a message that Anna Wagner from EPA called on the same issue, but I haven't reached out to her yet. Please let me know if you have any questions.

OK. Just a couple bullets for your consideration.

- The Region 5 monitoring group worked with Wisconsin to site a second ozone monitor in Sheboygan County to better understand the local ozone transport phenomenon and to help inform decisions during the ozone designations process.
- Region 5 has also had a number of meetings with representatives from the Wisconsin Department of Natural Resources, Sheboygan County, the City of Sheboygan, and the Sheboygan Chamber of Commerce to discuss ozone designations and the impact on the area.

Thanks,

Doug

Thank you for cc'ing me on that note so I would have a heads up about this!

Today, I got assigned the incoming letter in CMS for response, which I believe is a routing mistake. Given that it is about a specific location designation in R5, I believe it makes the most sense for you all in R5 to be the ones assigned the response to Sen. Johnson and Rep. Grothman. This has been the usual way of handling things, and also what OAQPS suggested to me moments ago. I'll plan on having it re-assigned to R5 unless I hear back that we need to discuss. Feel free to give me a ring.

Thanks,
Matthew

Hello-

I have attached the letter our office, along with Rep. Grothman, sent to Acting Admin. McCabe. Today, our office sent an e-mail out to some residents of Sheboygan County letting them know we sent the letter to EPA, however there is no mention that they

should call the EPA. I would suspect that the calls are coming from that, since the letter was sent Feb. 10.

One of my coworkers gave me a message that Anna Wagner from EPA called on the same issue, but I haven't reached out to her yet. Please let me know if you have any questions.

Hi Tyler,

It was nice meeting you in Milwaukee a couple of weeks ago. We are getting some citizen calls regarding a letter that Sen. Johnson sent to the EPA about Sheboygan County air quality. Would it be possible to get a copy of that letter? It will help us to respond.

Thanks,
John Mooney

FYI. It's unclear which ozone standard he's referring to. If it's the 2015, designations have been delayed, and the only recommendations are those made by the State.

Grothman: Sheboygan County unfairly targeted by EPA

Glenn Grothman, For USA TODAY NETWORK-Wisconsin Published 5:28 p.m. CT July 18, 2017 | Updated 5:43 p.m. CT July 18, 2017

I think we can all agree that it's important we have clean air to breathe and clean water to drink and enjoy, but it's also important that federal agencies display common sense when creating regulations for our air and water.

For decades, Sheboygan County has been locked in a battle with the Environmental Protection Agency (EPA). The county has been unfairly, and incorrectly, held accountable for pollutants coming from outside Wisconsin.

A study clearly shows the emissions are coming from elsewhere, yet the EPA is unwilling to take another look at Sheboygan County's nonattainment designation – a measure of air quality based on acceptable ozone levels.

Sheboygan County's nonattainment designation means that our companies and manufacturers in the area will have to fulfill additional permitting requirements, which include having more federal involvement by the EPA

in business decisions. As Sheboygan County competes for jobs with other states and countries, we cannot and should not force local businesses to spend millions unnecessarily.

The Wisconsin Institute for Law and Liberty, along with the Wisconsin Manufacturers & Commerce, last week released an op-ed and report on this same matter that correctly stated: “Companies in non-attainment areas must offset any new emissions that will result from proposed infrastructure (i.e. a new plant) or a major modification to existing infrastructure by purchasing unused emissions credits from others, or by reducing one’s own emissions. Where no offset can be found, a project may not go forward, ultimately resulting in a county like Sheboygan being considered a ‘No Grow Zone’ for new projects requiring an air permit.”

In Wisconsin’s Sixth District, we have the most manufacturing jobs of any congressional district in the country. It’s our lifeblood, and many of our communities would cease to exist without these jobs.

Many of these manufacturers are located in Sheboygan County (manufacturing accounts for 37 percent of jobs in the county), but the EPA’s nonattainment designation could force them to relocate, and it certainly discourages other manufacturers from moving to the area. It’s simply not right that our manufacturers are acting responsibly, but they – and the community as a whole – are still being punished for emissions coming from areas like Chicago and Indiana.

Additionally, this nonattainment designation hits all residents of Sheboygan County, even those who don’t work in manufacturing, through car emissions tests that cost both time and money, especially to middle class families.

This nonattainment designation is so ridiculous that it’s brought together a wide variety of groups like the Wisconsin Manufacturers & Commerce, the Wisconsin Department of Natural Resources, local business owners and federal officials. In fact, Sen. Ron Johnson and I recently signed a letter asking the EPA administrator to make sure that Sheboygan County is no longer unfairly classified with an ozone nonattainment designation.

But additional congressional action is required to prevent this from happening in the future.

Sen. Johnson and I are also sending a letter to the EPA requesting that 1) states, not Washington bureaucrats, determine the proper locations for ozone monitoring sensors; 2) a new distinction inside the current nonattainment status designation is created for counties to avoid penalties if they can scientifically prove that high readings are not being caused by industries in their area; 3) no air monitor placed within two miles of a coastline is designated as a county’s only air quality measurement device (ozone pollutants are easily blown over random coastlines after traveling across water); and 4) the EPA averages the readings of two air monitors when one is placed on a coastline and another is placed inland.

These steps will help to ensure that lakeshore counties, like Sheboygan County and others in the Great Lakes-region, are not unfairly targeted by the EPA for misleading ozone level readings.

We’re lucky enough to have a beautiful coastline along Lake Michigan, but the EPA’s misguided attempts to preserve it are hurting, not helping, the area. With a new administration in the White House, it’s time to act. I strongly urge EPA Administrator Scott Pruitt to work on resolving this injustice for the good of Sheboygan County and the state of Wisconsin.

U.S. Rep. Glenn Grothman is serving his second term representing Wisconsin’s 6th Congressional District in the U.S. House of Representatives.

OCT 31 2016

REPLY TO THE ATTENTION OF:
AT-18J

Ms. Gail Good
Director, Bureau of Air Management
Wisconsin Department of Natural Resources
P.O. Box 7921
Madison, Wisconsin 53707-7921

Dear Ms. Good:

The U.S. Environmental Protection Agency has reviewed the Wisconsin Department of Natural Resources' 2017 Annual Air Monitoring Network Plan and approves the plan and proposed changes to your network of air quality monitors, but for the following:

Ozone Monitoring Season Waiver/Petition for Reconsideration: With the revision of the ozone NAAQS in October, 2015, EPA extended Wisconsin's ozone monitoring season from March 1 through October 15 (40 CFR Part 58, Section 4.1(i)). WDNR submitted a Petition for Reconsideration to Gina McCarthy on December 18, 2015, which included a request to shorten Wisconsin's ozone season. Until the Petition for Reconsideration has been acted on, WDNR must plan to monitor for ozone, statewide, during the required ozone season in effect January 1, 2017. EPA's approval of Wisconsin's 2017 Annual Air Monitoring Network Plan does not constitute approval of the shortened ozone season requested by the State of Wisconsin.

NO₂ Area-Wide Monitoring Requirement: 40 CFR Part 58, Appendix D, Section 4.3 requires the Milwaukee-Waukesha-West Allis metropolitan statistical area to operate two NO₂ monitoring sites. One site should be collocated with a near-road site and a second representative of area-wide NO₂ emissions. Wisconsin meets the near-road NO₂ monitoring requirement with the College Avenue near-road station and the area-wide monitoring requirement with the NO₂ monitoring conducted at the Photochemical Air Monitoring Station (PAMS) site at Southeast Regional office (SER/DNR). Therefore, Wisconsin may discontinue/shut-down the PAMS monitor at SER/DNR with the exception of the NO₂ monitor.

EPA evaluated the plan, as well as information about monitoring sites submitted to the Air Quality System database, and confirmed, with the above exceptions, that your network meets the operational requirements of 40 CFR Part 58.

We acknowledge and approve the following specific modifications included in WDNR's annual network plan:

Relocation of PM2.5 Monitor from Milwaukee-Fire Station (55-079-0056) to Near-Road Site at Milwaukee-College Avenue (55-079-0056): WDNR proposed to relocate the currently operating PM2.5 monitor from the Milwaukee Fire Station to the existing near-road site located at College Avenue to meet PM2.5 monitoring requirements at the near-road location.

Meteorological Towers – Shut-Downs and Tower Height Waivers: Meteorological towers are only required at NCore (40 CFR Part 58, Appendix D, Section 3(b)) and PAMS (40 CFR Part 58, Appendix D, Section 5.3, Table D-6). Since none of the proposed meteorological tower shut-downs and height requirement deviations are at either NCore or PAMS, a waiver is not necessary or appropriate. The Quality Assurance Handbook for Air Pollution Measurement Systems Volume IV: Meteorological Measurements Version 2.0 (Final) states that “in most cases, to accommodate wind speed/wind direction sensors, a meteorological tower must be able to reach a height of 10 meters”. This is to ensure that the wind speed/wind direction measurements are not affected by surface conditions. Meteorological tower heights less than 10 meters may cause the data to be less useful.

PAMS removal: The PAMS monitoring requirements were revised on October 16, 2015. These revisions changed network requirements for fixed PAMS and requires Enhanced Monitoring Plans (EMP) (40 CFR Part 58, Appendix D, Section 5). As a result, at this time, Wisconsin is no longer required to operate PAMS sites. However, Wisconsin may be required to develop and implement an EMP for ozone and ozone precursors for Moderate and above 8-hour ozone nonattainment areas. An EMP must be submitted to the Regional Administrator no later than October 1, 2019 or two years following the effective date of a designation classification of Moderate or above for ozone nonattainment. Elements of an EMP are outlined in 40 CFR Part 58, Appendix D, Section 5(h).

If you determine that changes to your monitoring network are needed due to unplanned circumstances or revisions to the federal ambient monitoring and quality assurance requirements, the modifications must be reviewed and approved by EPA.

EPA appreciates your partnership in conducting ambient air monitoring. We look forward to working with you to continuously improve the quality of ambient air in Wisconsin. If you have any question or comments regarding this network review, please contact Michael Compher, Air Monitoring and Analysis Section Chief, at (312) 886-5745.

Sincerely,

Edward Nam
Acting Director
Air and Radiation Division
